Authorization for this examiner's amendment was given in a telephone interview with Tyler Stevenson on 4/4/06.

The application has been amended as follows: In claims 1 and 20, (iii), lines 1 and 2 the following phrases have been deleted: "at least one acid scavenger selected from the group consisting of" and "and amorphous basic aluminum magnesium carbonates". In the penultimate line of the same claims the phrase "acid scavengers of component (iii) are" has been replaced by --the hydrotalcite--.

2. The following is an examiner's statement of reasons for allowance: The Declaration by Dr. Kaprinidis proves that the low concentration of hydrotalcite is critical for optimum flame-retardance.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
